Mickey Blake developed Floral Soil as an alternative to chemically derived flower foams to meet seven major goals. It had to support cut flowers, hold water, and grow seeds and also had to be non-toxic, plant derived, biodegradable, and safe enough to eat.

FLORAL SOIL SOLUTIONS

Floral Soil cupcakes and bricks will be available nationwide in January 2016.

Zach Wilkinson and Craig Kasberg founded Tidal Vision with the goal of inventing valuable and environmentally safe solutions for the billions of pounds of fishery waste Alaska produces annually.

Tidal Vision

From the Ocean, for the Ocean.

They've developed patent-pending methods for processing ocean byproducts into aquatic leathers and Chitoskin, and are currently selling salmon leather wallets.
