

Global Climate Change: What is it? How will it affect us?

SCIENCE CAFÉ

The Science Café hosted by the American Chemical Society

FEATURING

Dr. Andy Jorgensen, National Center for Science Education (NCSE)

The American Chemical Society invites you to bring your thoughts and participate in a lively discussion that will highlight our changing climate and its effect on us and the chemistry involved.

Dr. Jorgensen will speak and converse about the phenomenon and methods that have been used to characterize climate change, especially the human dimension of the problem. Consequences and proposed solutions will also be shared.

While participating in the discussion, you will be a part of the process that can help influence the general public to these ideas.

Koshland Science Museum

The National Academies
500 Fifth Street, N.W.
