The Kitchen as Laboratory – Case Study: Making Ice Cream in a Bag

Sunday, August 19, 12:00-1:00 PM ET

Is it possible to make tasty ice cream in a plastic bag with simple ingredients? Yes it is - but only with a spoonful of chemistry and a pinch of physics! Join us as renowned food scientist, Dr. Cesar Vega, coauthor of The Kitchen as Laboratory, illustrates how using partition coefficient knowledge and the freezing process can help you make delicious ice cream.

Covert Job Searching While Still Employed: Tips and Tricks

Sunday, August 19, 3:00-4:00 PM ET

The best time to advance your career and search for a new job is while you are still employed. But how do you go about using social media for job searching and building your network without alarming your employer? Deborah Smith, social-media strategist, and Dr. Dave Harwell, ACS Careers, share insights. Tune in LIVE for an opportunity to get your questions answered.

DOUBLE-FEATURE MOVIE NIGHT - SNACKS PROVIDED

Sunday, August 19, 6:30- 9:30 PM ET

1. Chemistry and the Environment Film Series – “Carbon for Water”

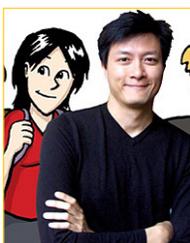

Sunday, August 19, 6:30- 7:30 PM ET

One-sixth of the world's population lacks access to safe drinking water. Thus the American Chemical Society launched Pennies for PUR Water for the International Year of Chemistry 2011. This program provided funding for sachets that can safely treat 2.5 gallons of water. The movie “Carbon for Water,” directed and produced by Evan Abramson and Carmen Elsa Lopez, presents a similar program in Kenya where a company aims to provide 900,000 water filters to villagers to reduce the practice of boiling water via burning wood and decrease deforestation and CO₂ emissions. Come view the movie and stay for the discussion.

2. PhD Movie - A Dose of Comedy, Humor, and Laughter

Sunday, August 19, 7:30- 9:30 PM ET

Feeling overwhelmed with school or work? You are not alone! A recent survey by UC Berkeley found that 95% of all graduate students feel overwhelmed. Join Jorge Cham, author of PhD Comics, as he recounts his experiences as a graduate student, university instructor, and researcher. Jorge will also screen his movie “Piled Higher and Deeper,” a live-action adaptation of his popular online comic strip. Learn the wonderful benefits of laughter again—it’s free!

One Size Does Not Fit All - Five Tips to Make the Right Career Choice

Monday, August 20, 10:30 - 11:30 AM ET

Are small companies hiring more scientists? Are you better suited as a big fish in a small pond or a small fish in a big pond? Differences abound in what small vs. large companies look for; there should also be differences in your job search strategies! Join our speaker, Kara Allen from AEGIS Sciences and Dr. Dave Harwell from ACS Careers, to learn how to evaluate your fit and to tailor your job hunting techniques to secure the right job.

The Introverts’ (and Shy Guys and Gals) Guide to Success in Science and Leadership

Monday, August 20, 3:00-4:00 PM ET

Is being shy keeping you from success? Being an introvert may be a personality trait, but being “outgoing” and communicating well are learned behaviors. You do not want to miss this talk as Dr. Judith Giordan shares her transformative experience of overcoming challenges of being the “shy” scientist to a successful corporate executive and entrepreneur. Learn how you can do it too!

Off-The-Bench Career Options for Chemists - It’s Possible!

Tuesday, August 21, 10:30-11:30 AM ET

The world is your oyster but you are stuck at the bench. Is it time to re-think your career? The skills you obtain as a BS/MS/PhD scientist are valuable, but not only in traditional science jobs. Did you know that your science training and skill set can open doors to business, law, public policy, and writing? Join our panel of scientists as they describe how traditional skills are more easily applied to alternative careers than you think!
