C.S. Hsu, P.R. Robinson (Eds.)

**Springer Handbook of Petroleum Technology**

Series: Springer Handbooks

- Comprehensively describes all aspects of petroleum technology, including exploration, transportation and refining of petroleum and natural gas
- Provides an extensive and comprehensive review of state-of-the-art techniques and technologies used in the industry
- Offers a reference resource for the oil-refining and petrochemical-production businesses

This handbook provides a comprehensive but concise reference resource for the vast field of petroleum technology. Built on the successful book "Practical Advances in Petroleum Processing" published in 2006, it has been extensively revised and expanded to include upstream technologies. The book is divided into four parts: The first part on petroleum characterization offers an in-depth review of the chemical composition and physical properties of petroleum, which determine the possible uses and the quality of the products. The second part provides a brief overview of petroleum geology and upstream practices. The third part exhaustively discusses established and emerging refining technologies from a practical perspective, while the final part describes the production of various refining products, including fuels and lubricants, as well as petrochemicals, such as olefins and polymers. It also covers process automation and real-time refinery-wide process optimization. Two key chapters provide an integrated view of petroleum technology, including environmental and safety issues.

Written by international experts from academia, industry and research institutions, including integrated oil companies, catalyst suppliers, licensors, and consultants, it is an invaluable resource for researchers and graduate students as well as practitioners and professionals.

Springer Handbook of Petroleum Technology

1. Introduction
Paul R. Robinson, Chang Samuel Hsu

2. Safety and the Environment
Paul R. Robinson

Petroleum Characterization
3. Molecular Science, Engineering and Management
Chang Samuel Hsu

4. Petroinformatics
Manhoi Hur, Sungwhan Kim, Chang Samuel Hsu

5. Separations in the Sample Preparation for Sulfur Compound Analysis
Jan T. Andersson

6. Asphaltenes
Oliver C. Mullins, Andrew E. Pomerantz, A. Ballard Andrews, Rudraksha Dutta Majumdar, Paul Hazendonk, Yosadara Ruiz-Morales, Lamia Goual, Richard N. Zare

7. Reservoir Evaluation by DFA Measurements
Oliver C. Mullins, Go Fujisawa

8. Phase Behavior and Properties of Heavy Oils
John M. Shaw, Marco A. Satyro, Harvey W. Yarranton

Exploration and Production
9. Petroleum Geology
Hendratta N. Ali

10. Origin of Petroleum
Clifford C. Walters

11. Basin and Petroleum System Modeling
Kenneth E. Peters, Oliver Schenk, Allegra Hosford Scheirer, Björn Wygrala, Thomas Hantschel

12. Seismic Exploration
Graham Ganssle

13. Formation Evaluation
Donald G. Hill

14. Petroleum Production Engineering
Shengnan Chen

15. Offshore Production
Ekaterina V. Maksimova, Cortis K. Cooper

Refining Technologies
16. Petroleum Distillation
Chang Samuel Hsu, Paul R. Robinson

17. Gasoline Production and Blending
Chang Samuel Hsu, Paul R. Robinson

18. Catalytic Reforming
Pierre-Yves LeGoff, William Kostka, Joseph Ross

19. Fluid-Bed Catalytic Cracking
James G. Speight

20. Sulfur Removal and Recovery
Paul R. Robinson

21. Modern Approaches to Hydrotreating Catalysis
Joo-il Park, Isao Mochida, Abdulazeem M.J. Marafi, Adel Al-Mutairi

22. Hydrocracking
Paul R. Robinson, Geoffrey E. Dolbear

23. Hydroprocessing Reactor Internals
F. Emmett Bingham, Douglas E. Nelson, Daniel Morton

24. Hydrogen Production
M. Andrew Crews, B. Gregory Shumake

25. Hydrogen Network Optimization
Nick Hallale, Ian Moore, Dennis Vauk, Paul R. Robinson

26. Model-Predictive Control
Paul R. Robinson, Dennis Cima

27. Modeling Refining Processes
Teh C. Ho

28. Refinery-Wide Optimization
Dale R. Mudd, Clifford C. Pedersen, Maurice D. Jett, Srikanth Karur, Blaine McIntyre, Paul R. Robinson

29. Rigorous Kinetics Modeling of Hydrogen Synthesis
Milo D. Meixell, Jr

30. Delayed Coking
Keith Wise-carter

31. Transitioning Refineries from Sweet to Extra Heavy Oil
Martin R. Gonzalez

32. Carbon Dioxide Mitigation
Sultan M. Al-Salem, Xiaoliang Ma, M. Mubarak Al-Mujaibel

Petrochemicals and Emerging Technologies
33. Conventional Lube Basestock
Brent E. Beasley

34. Premium Lubricant Base Stocks by Hydroprocessing
Stephen K. Lee, John M. Rosenbaum, Yalin Hao, Guan-Dao Lei

35. Synthetic Lubricant Base Stock
Margaret M. Wu, Suzzy C. Ho, Shuij Luo

36. Catalytic Processes for Light Olefin Production
Zhu Genquan, Xie Chaogang, Li Zai Ting, Wang Xieqing

37. Polyolefins
David Fiscus, Antonios Doufas, Sudhin Datta

38. Biomass to Liquid Fuels
Gary Brodeur, Subramanian Ramakrishnan, Chang Samuel Hsu

39. Renewable Diesel and Jet Fuels
Henrik Rasmussen

40. Small Scale Catalytic Syngas Production with Plasma
Adam A. Gentile, Leslie Bromberg, Michael Carpenter

41. Hydrocarbon Processing by Plasma
Robert J. Wandell, Bruce R. Locke
