

## Plan your symposium for IUPAC 2011 – Funding is available!

The next [International Union of Pure and Applied Chemistry \(IUPAC\) World Chemistry Congress](#) will take place from July 30 through August 7, 2011 in beautiful Puerto Rico.

As if the [location](#) is not enticing enough, the meeting's theme: *Chemistry Bridging Innovation among the Americas and the World* is sure to attract many influential chemists from around the world, including **2009 Nobel Laureate in Chemistry Ada E. Yonath**, from Israel's Weizmann Institute of Science, who will deliver the meeting's Plenary Lecture.

ACS members are encouraged to develop symposia for this exciting international event. [Challenge Grants](#) of up to \$25,000 are available for symposium development and implementation. Special consideration will be given to proposals for technical symposia that recognize the international and multidisciplinary nature of the IUPAC Congress and the 2011 meeting theme.

**This could be you!**  
(...after your symposium, of course...)

**Submit your proposal now! See you in Puerto Rico!**
