

Lehigh Valley Symposium

CRISPR Implementation and Ethics

The relative ease by which gene-editing can now be pursued using CRISPR has accelerated the need to discuss the ethical and policy issues related to widespread use of the technology.

Join us for an interdisciplinary gathering of scientists, humanists, researchers, students, and members of the Lehigh Valley community for a lively discussion of the implications of CRISPR gene-editing technology.

A student poster session will provide an opportunity for the Lehigh Valley community to engage in scholarly conversations beyond conventional disciplinary boundaries.

SATURDAY
SEPTEMBER 17, 2022

9AM - 5PM

Williams Center for the Arts, Lafayette College

Keynote speakers:

Dr. Rina Bliss

Rutgers University
Author of *Race Decoded: The Genomic Fight for Social Justice*

Dr. Sam Sternberg

Columbia University
Co-author of *A Crack in Creation: Gene Editing and the Unthinkable Power to Control Evolution*

- Free registration
- Includes lunch
- Student poster session
- Faculty and student speakers
